

Invitation to Present

Three Rings of Success: Vision • Technology • Action

Don't miss your opportunity to be part of this prestigious event!
Share your latest advancement, technical success or case study with the industry.

Abstracts deadline is November 3, 2022

SUGGESTED TOPICS BY TRACK

Coating & Graphic Arts

- Packaging, Label, and Digital Coating Applications
- Novel Coating and Process Technologies
- Advances in Printing and Graphic Arts
- Coating, Printing and Finishing Solutions

[Click here](#) for a track description and specific topics

Papermaking Additives

- Process and Functional Additives
- Novel Additives
- Methods and Applications

[Click here](#) for a track description and specific topics

Papermaking Fundamentals

- Fiber suspension dynamics in the approach flow, headbox, forming and press sections
- Product performance and the relationship to physical properties of paper and board
- New technologies for improving the circularity of fibre-based packaging
- Advances in 3D fibre forming/molding
- Novel technologies in forming, pressing and drying
- Modelling to simulate water removal, water balance, and rewetting
- Energy saving technologies for improving heat efficiency

[Click here](#) for a track description and specific topics

Papermaking Technology and Operations

- Innovations in the Papermaking Process
- Innovations in the Papermaking Systems
- Innovative Paper Products
- Innovation in Paper Machine Research
- Papermaking Success Stories

[Click here](#) for a track description and specific topics

PIMA Management

- Workforce Development
- Information Technology (IT)

[Click here](#) for a track description and specific topics

Process Control

- Innovative paper machine control solutions (MD, CD, wet-end, color, etc.)
- Success stories of data analytics for papermaking applications
- Comprehensive papermaking process and/or control diagnostics
- Solutions for sustaining long-term control performance
- Best practices of papermaking transition (speed, grade, or shade change) automation

[Click here](#) for a track description and specific topics

Reliability & Maintenance

- Precision Maintenance
- Application Review
- Implementation Plan and Team
- Solutions for Catastrophic Failure
- Cost Reduction

[Click here](#) for a track description and specific topics

RPTA - Recycled Paperboard Technical Association Production – Technical Seminar

- Wet end improvements
- Fiber recovery optimization, including dissolved air flotation (DAF) systems
- Best practices for process data, including collection, storage, and use
- Safer operations: dryers through calendar stacks

[Click here](#) for a track description and specific topics

Tissue

- Sustainability
- Quality Improvement
- Tissue Production and Converting Operation
- Data Management
- New Technologies

[Click here](#) for a track description and specific topics

Topics for EVERYONE*

- Innovations
 - Success Stories
 - Data Analytics
 - Energy Production
 - Sustainability
 - Recycling
 - Maintenance
- *Open to everyone. Partner with all tracks for topics everyone can relate to. No paper or manuscript required.*

Interested in participating in TAPPICon’s New Technology Showcase, Poster Session or Hot Topics Breakfast?

We want to hear from you. Click below for more details:

[New Technology Showcase](#) • [Hot Topics Breakfast](#) • [Poster Session](#)

SUBMITTAL INFORMATION

Abstracts due: **November 3, 2022**

Abstracts submittal: [Click here](#) to submit your abstract

Event Website: <http://tappicon.org/>

Event Dates/Location: April 22-26, 2023 in Atlanta, Georgia USA

For more information contact:
